

**The Anchor Explorer system (EXPLOR)** is for small speech applications. It has 2 microphone inputs and another line input that could be used to hook in an Ipod, cd player or laptop. This system can also be battery powered for outdoor applications when power is an issue. The battery generally lasts up to six hours depending on use.

**The Anchor Liberty system (LIBERTY)** is for speech applications. It has 2 microphone inputs and another line input that could be used to hook in an Ipod, cd player or laptop. The Liberty+ comes with a companion speaker for slightly larger crowds. This system can also be battery powered for outdoor applications when power is an issue. The battery generally lasts up to six hours depending on use.

**The Yamaha Stagepass system (STAGEPSS)** is great for small family gatherings, or corporate meetings, or that solo performance in a coffee shop. It has 4 microphone inputs as well as separate inputs for a cd player or MP3 player.

**The Small Rental PA (SPA)** can be made up of a combination of 2 Mackie SRM 450's, JBL Eon's, or the new Electro Voice Tour X 1122's. This package includes a small mixer, amplifier, microphone, stands and cabling. This is for a small band, wedding, DJ, or any gathering up to about 300 people. Subwoofers, CD players and wireless mics are not included in package pricing, but can be added for an additional price.

**The Medium Rental PA (MPA)** consists of 2 Electro Voice Tour X 1152's. These speakers offer a little more volume and dynamic range for your event than the small rental PA. This package includes a small mixer, amplifier, microphone, stands and cabling. This would be great for a smaller band or DJ. It will also do great for the spoken word up to 500 people. Subwoofers, CD players and wireless mics are not included in package pricing, but can be added for an additional price. If you're not completely sure how this all hooks together plan a little extra time upon pick up so that we can show you how it works!

**The Large Rental PA (LPA)** is a high volume system that is design more for the experienced user, yet it is fairly simple to setup. This is great for the medium size band in a club, or a DJ to have more low end. This package includes a small mixer, amplifier, microphone, stands and cabling. You can even get the Yamaha MG 16 mixer with this system, which has up to 16 inputs and onboard effects. Subwoofers, CD players and wireless mics are not included in package pricing, but can be added for an additional price.

### **Subwoofer Packages**

Single 18" or double 18" subwoofer packages can be added to any of these packages for an additional discounted price. Package includes amplifier, processing and cables.
